

## SEEING STARS 19TH-CENTURY SWISS TELESCOPE

*Monumental size. Rare model. Scientific treasure.* This rare telescope was constructed by the renowned Swiss firm Perrelet of Geneva. Raised and lowered by a precise system of weights and pulleys, this over-seven-foot long instrument features an ingenious "catapult" base that allows it to slide from side to side as well as up and down. Expertly constructed by a true scientific virtuoso and beautifully maintained, this colossal period telescope is a true wonder. Circa 1810. 100" w x 47" d x 89" h. #30-3345

630 Royal Street, New Orleans, Louisiana • 877-677-2801 • [ws@rauantiques.com](mailto:ws@rauantiques.com) • [rauantiques.com](http://rauantiques.com)

Since 1912, M.S. Rau Antiques has specialized in the world's finest art, antiques and jewelry. Backed by our unprecedented 125% Guarantee, we stand behind each and every piece.
